There is not an available house, room or suit of rooms upstairs or down stairs in the town, where a family could live and to our knowledge there is calls for a half dozen or more houses. Some of those who own lots in Bethuram & Lewis addition should get busy and erect some residences.

State Board of Health of Kentucky

How To Prevent Influenza and Pneumonia

TO THE PEOPLE OF KENTUCKY:

During the months of January, February and March half of the deaths in Kentucky were caused by Influenza and Pneumonia. Fourteen thousand Kentuckians died from these diseases during 1918. Definite experience in Kentucky indicates that deaths from these causes are preventable, and this appeal is written for the purpose of preventing local epidemics which promise to be as fatal in many instances as last year. This statement is not issued to alarm the people but merely to call their attention to a serious state of facts and the remedy for them.

Those who are properly inoculated rarely develop pneumonia, and there have been but three deaths reported from this disease in the half-million already inoculated. Material for inoculation is furnished free by the State Board of Health. Go to your doctor and be inoculated. If you are not able to pay for the service, go to your Health Officer and have it done without cost.

Avoid visiting the sick, especially if they have colds or sore throats. It is frequently difficult even for a doctor to tell a bad cold from mild influenza. Pneumonia, in nearly every case, is following neglected mild influenza. If you take cold, go home for safety of the community, to a well ventilated room by yourself for the safety of your family and to your bed for your own safety. Send for your doctor, but if you are unable to get him, take a dose of castor oil, drink water freely, and eat soups, eggs and other soft food, salted to taste. Avoid whiskey. It neither prevents nor cures influenza. Stay in bed until the cold is well, and if you stay by yourself, chances are you will not develop pneumonia. If you do these things and have been inoculated, you are practically certain not to develop pneumonia. Go to your nose and mouth with your handkerchief when sneezing or coughing, and persuade others to do so. Don't go where crowds are, and if you find yourself where someone is sneezing and coughing, leave immediately.

Local epidemics of influenza are now occurring and are likely to occur from time to time for the next two or three years, but they can be avoided by any community, family or individual if they will do these things.

Be inoculated today.

CARDUI

The Woman's Tonic

You can rely on Cardui. Surely it will do for you what it has done for so many thousands of other women. It should help. "I was taken sick, seemed to be . . .," writes Mrs. Mary E. Vesie, of Madison Heights, Va. "I got down so weak, could hardly walk . . . just staggered around. . . I read of Cardui, and after taking one bottle, I felt much better. I took 3 or 4 bottles of that time, and was able to do my work. I take it in the spring when run-down. I had no appetite, and I commenced eating. It is the best tonic I ever saw." Try Cardui.
